OK, What is OSINT?

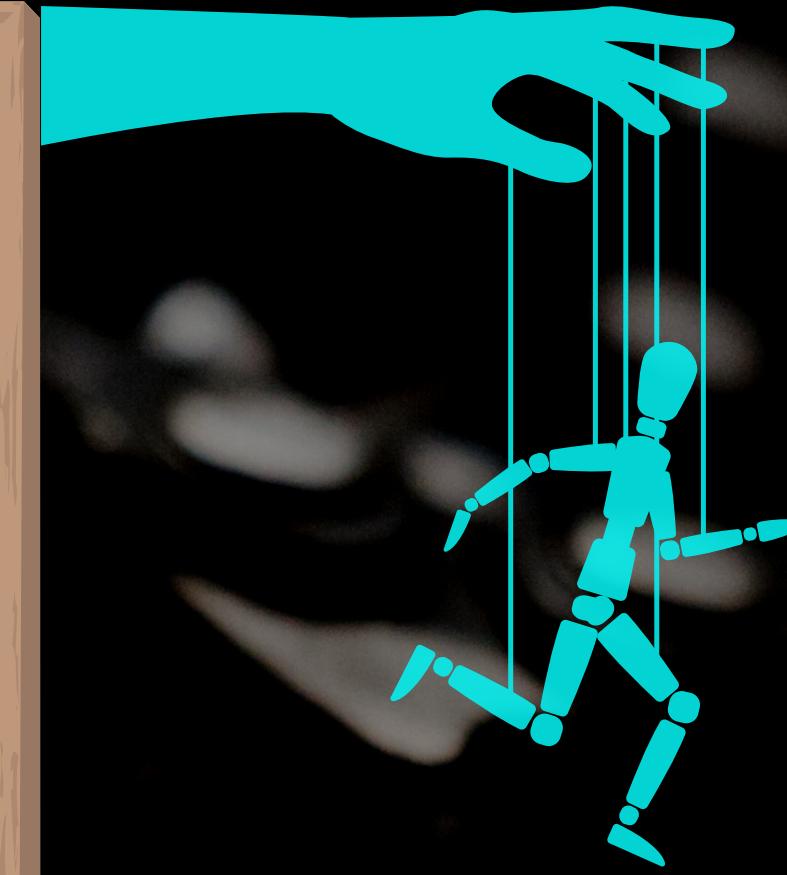

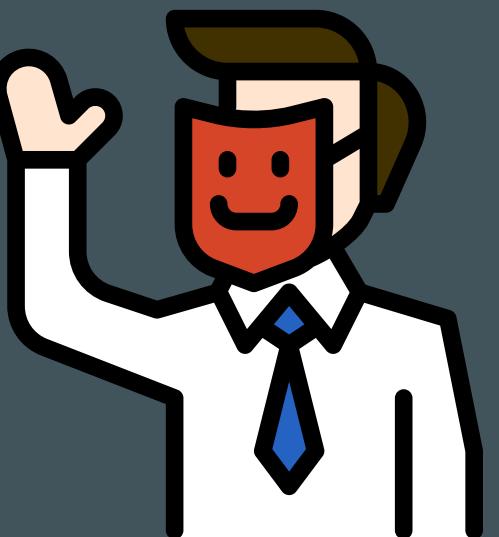

Open-source intelligence (OSINT) is a multi-factor methodology for collecting, analyzing and making decisions about data accessible in publicly available sources to be used in an Intelligence

**"The internet is just one giant book that is written in real-time, about all of us.
- You just have to know how to read it**

SOCK PUPPETS?

Sock puppets are fake social media accounts that are carefully created to perform OSINT research without divulging the true identity.

A screenshot of a search results page from a web browser. The search query is "intext:password site:pastebin.com". The results are filtered by "All" and show two snippets from pastebin.com. The first snippet is titled "simple password checker redstone - Pastebin.com" and contains Python code for a password checker. The second snippet is titled "Python code for basic security camera (Part1) - Pastebin.com" and contains Python code for an FTP server. The browser interface includes a navigation bar with "All", "News", "Maps", "Images", "Books", "More", and "Tools" buttons, and a date/time header.
